OPERATING SUMMARY

Production	1.55 MMcf/d
Exploration	5 blocks
Appraisal	2 blocks
Development	1 block

KEY PAKISTAN FACTS

- Pakistan offers an excellent operating environment, with potential resources of 27 billion barrels of oil and 282 Tcf of natural gas with fewer than 750 exploration wells drilled (www.pakboi.gov.pk). Pakistan has a well developed and integrated infrastructure for transporting and distributing natural gas (9,063 km transmission lines and 67,942 km service lines)
- In 2007/2008, the average oil production in Pakistan was 69,952 bopd and gas production was 3,973 MMcfpd
- Daily shortfall of 300,000 bopd oil and 500 MMcfpd gas
- Government of Pakistan taking steps to enhance domestic gas development
- Increasing gas price: pursuant to 2009 Petroleum Policy, regulated gas price indexed to world oil price
- During 2007/2008, 26 exploratory wells were drilled in Pakistan resulting in 11 oil and gas discoveries
- Excellent fiscal terms:
 - 12.5% royalty expensed
 - 40% income tax
 - no ring fencing
- Population: 166 million
- Recent IMF financing package
- GDP: US\$171 billion (\$440 billion purchasing power parity)(2008)
- 6% GDP growth (2008)

BOARD OF DIRECTORS

Stephen C. Akerfeldt
Timothy M. Elliott
Graham S. Garner
Norman W. Holton
Nigel R. McCue
Peter Whitbread

OPERATIONS

Jura's plans include drilling an additional seven exploration wells and fourteen development wells.

Production

- Block 22 is a producing gas field with ongoing development opportunities
- Current gross natural gas production is 15 MMscf/d; Jura's working interest is 10.5% or 1.5 MMscf/d

Development

- Jura holds a 37.5% working interest in the Kandra (shallow) lease
- 769 Bcf remaining reserves of low Btu gas (McDaniel & Associates, September 2008)

Appraisal

- 35% working interest at Kandra (deep)
- 10.5% working interest at Hamza

Exploration

- Five high-impact exploration blocks covering 1.2 million acres
 - 37.5 % working interest at Badin IV North
 - 37.5 % working interest at Badin IV South
 - 37.5 % working interest at Karsal
 - 35% working interest at Mirpur Mathelo
 - 37.5% working interest at Salam

Power Project

- The Kandra (shallow) development plan calls for low Btu gas to be used as a blend feedstock to fire a 60/120MW power facility in which Jura will have an interest. The Pakistan Government has granted preliminary approval for the project
