

Micro cap oil and gas exploration company with fully funded drilling program beginning in the second half of 2010. Wells to be high-impact given company's low market capitalization (currently <C\$5 million). Recently announced 2010 Drilling program includes:

**Wahid-1 exploration well in Badin IV North (TD 2300m)
 Gharahi-1 exploration well in Badin IV South (TD 2625m)**

Jura Energy Corporation is an international energy company engaged in the exploration, development and production of petroleum and natural gas properties with activities conducted exclusively in Pakistan. Jura conducts its business in Pakistan through its subsidiary, Frontier Holdings Limited.

MARKET SUMMARY

Symbol	TSX:JEC
Shares outstanding:	
Basic:	117.8 million
Fully diluted:	117.8 million

OPERATING SUMMARY

Exploration	5 blocks
Development	1 block

FINANCIAL ASSETS

- Cash US\$2 million
- Note receivable (current) US\$1.3 million
- Restricted cash of US\$2.4 million securing guarantees (US\$1.1 million to be released in 2010)
- US\$1 - 1.25 million in carry on each of the next 6 wells
- Market capitalization <C\$5 million

KEY PAKISTAN FACTS

- Pakistan offers an excellent operating environment, with potential resources of 27 billion barrels of oil and 282 Tcf of natural gas with fewer than 775 exploration wells drilled (www.pakboi.gov.pk). Pakistan has a well developed and integrated infrastructure for transporting and distributing natural gas (9,063 km transmission lines and 67,942 km service lines)
- In 2008/2009, the average oil production in Pakistan was 65,845 bopd and gas production was 4,002 MMcfpd
- Government of Pakistan is taking steps to enhance domestic gas development
- Increasing gas price: pursuant to 2009 Petroleum Policy, regulated gas price indexed to world oil price
- Excellent fiscal terms:
 - 12.5% royalty expensed
 - 40% income tax
 - no ring fencing
- Population: 166 million
- Recent IMF financing package
- GDP: US\$171 billion (\$440 billion purchasing power parity)(2008)
- Foreign direct investment of US\$3.72 billion in 2009

BOARD OF DIRECTORS

Stephen C. Akerfeldt

Facsimile: +1 (403) 266-6365

OPERATIONS

Jura's plans include drilling an additional seven exploration wells and fourteen development wells, including two exploration wells in 2010.

2010 Drilling Program

- Wahid-1 exploration well in Badin IV North (TD 2300m)
- Gharahi-1 exploration well in Badin IV South (TD 2625m)

Development

- Jura holds a 37.5% working interest in the Kandra (shallow) lease
- 435 to 1.339 Bcf contingent resource (gross) of low Btu gas (McDaniel & Associates, September 2009)
- Government approved Development Plan

Exploration

- Five high-impact exploration blocks covering over 995,000 acres
 - 27.5 % working interest in Badin IV North
 - 27.5 % working interest in Badin IV South
 - 35% working interest in Mirpur Mathelo
 - 37.5% working interest in Salam
 - 35% working interest in Kandra (deep)

Power Project

- The Kandra (shallow) development plan calls for low Btu gas to be used as a blend feedstock to fire a 60/120MW power facility in which Jura will have an interest. The Pakistan Government has granted preliminary approval for the project
